HYDROFLUX SHOE

2058: HydroFlux – Women's Sea Sprite

2059: HydroFlux – Men's Carbon

2060: HydroFlux – Men's Spindrift

MATERIALS

Outsole: Rubber

Midsole: EVA

Upper: Synthetic quick-dry materials.

FEATURES

- **Harken's One-Way Drainage System:** A full-length 9-point drainage system drains water away from the foot through a series of internal channels in the sole. Our one-way system prevents water and debris from reentering the shoe through the drainage ports.
- **Harken's Radial Traction Zones:** The full 360-degree pattern of siping allows siping flexion of the sole in all directions. This pattern is placed under the 3 main pressure zones of your foot to give each area independent traction. Used in combination with a special rubber compound, traction is greatly increased.
- Women's HydroFlux fit designed specifically for women's feet (2058 only).
- Highly breathable, quick-dry mesh with protective layer against the foot.
- Breathable aerated synthetic leather for support and protection.
- TPU (Thermoplastic urethane) toe cap for protection.
- Integrated tongue wing to keep tongue in place.
- Fasten-quick system with lace stopper.
- Stretch lace protector.
- Nonmarking, nonrusting components.
- Antibacterial silver-woven footbed kills odor-causing bacteria.
- Full-length compression-molded EVA midsole for shock absorption, neutral pronation, and all-day comfort.
- Stability Track – Controls ankle and foot rotation while maintaining freedom of movement.
- Metatarsal Support provides all-day forefoot support in a wider toe box for improved balance.
- Active Arch Support reduces strain on plantar fascia and aligns knees.
- Molded heel cup provides shock absorption, support, reduces fatigue.
