**VORTEX SHOE**

2051: Vortex – Men's Graphite

2053: Vortex – Men's Marine

2061: Vortex – Women's Carbon

2062: Vortex – Men's Carbon

**MATERIALS**

Sole: Rubber

Midsole: EVA

Upper: Synthetic

**FEATURES**

- **Harken's One-Way Drainage System:** A full-length, 9-point drainage system drains water away from the foot through a series of internal channels in the sole. Our one-way system prevents water and debris from reentering the shoe through the drainage ports.
- **Harken's Radial Traction Zones:** The full 360-degree pattern of siping allows siping flexion of the sole in all directions. This pattern is placed under the 3 main pressure zones in your foot to give each area independent traction. Used in combination with a special rubber compound, traction is greatly increased.
- Quick-dry materials.
- Nonmarking, nonrusting components.
- Integrated neoprene collar provides comfortable, secure fit.
- Lace Stopper for no-tie fastening (2061 and 2062 only).
- Neoprene lace protector.
- Antibacterial silver-woven footbed kills odor-causing bacteria.
- Full-length compression-molded EVA midsole for shock absorption, neutral pronation, and all-day comfort.
- Stability Track – Controls ankle and foot rotation while maintaining freedom of movement.
- Metatarsal Support – All-day forefoot support in a wider toe box for improved balance.
- Active Arch Support – Reduces strain on plantar fascia and aligns knees.
- Molded Heel Cup – Provides shock absorption, support, reduces fatigue.
